The Ultimate Exterior Screw

"Bronze Star" Screws are designed for exterior professional operations using hard or soft woods, chipboard and other tough materials. The bronze finish gives this fastener extra corrosion resistance.

"Bronze Star" Exterior Flat Head Screws

1^{1/4}" to 6" lengths

Bronze Ceramic Coating

- Rated for excellent corrosion resistance
- Compatible with chemically-treated materials

Type 17 Notched Extra Sharp Point

- Starts quickly without 'walking'
- Reduces need for pre-drilling
- Cuts through composite material on first rotation

Tiny Cuts on the Threads

- Cut through fibrous materials and greatly reduces the torque needed to drive the screw without affecting holding power

High Quality Steel

- Heat treated
- Hardened

Compatible with
pressure
treated lumber

Deep, Wide, Sharp Threads

- Cut cleanly & easily
- Provide maximum holding power

Knurled Shoulder

- Reams hole in board being fastened, reducing drag on shank and driving tool

True Flat Head with 16 Cutting Nibs

- Self-countersinking
- Prevents spin-out

Star Drive Recess

- Reduces camout and end load
- Twice the torque of Phillips or square drive
- Eliminates spinning and fastener damage
- Two recess sizes (20 & 25) to match the torque requirements of the screw size
- Gives better bit life

"Bronze Star" Exterior Trim Head Screws

For interior or exterior finish work

1^{5/8}" to 4" lengths

Type 17 Point

- Drives easily
- Reduces splitting

T-20 Drive Size
• For proper torque

Compatible with
pressure
treated lumber

Small Head with Cutting Nibs

- Self-countersinking
- Gives a professional-looking appearance
