Washer Head Construction Lag Screws

Heat treated and hardened, these screws are stronger and more durable than ordinary lag screws. They are lubricated and have deep cutting threads for quick, easy driving and sharp notched point for exact, quick starting with no 'walking'. A built-on round washer with smooth edges gives a professional finish. This unique design usually eliminates the need for pre-drilling and provides a neat, finished appearance.

Washer Head Construction Lag Screw

5/16 x 2 1/2" to 3/8 x 12" lengths

Type 17 Notched Extra Sharp Point

- Starts quickly without 'walking'
- Significantly reduces splitting & drive torque requirements by removing wood from the hole as the screw penetrates instead of forcing the wood apart

Significantly Reduces Need for Pre-Drilling!

Deep, Wide, Sharp Threads w/ Spiral Notches

- Reduces driving torque needed

Hardened Heat-Treated Steel

- Exterior ceramic coating on 2 1/2" to 6" sizes
- Yellow zinc coating on 7" to 12" sizes

Smooth Edges

- Give a finished appearance

Built-On Round Washer Head

- 5/8" diameter on 2 1/2" to 6" sizes
- 11/16" diameter on 7" to 12" sizes

Star Drive Recess

- Reduces camout and end load
- Twice the torque of Phillips or square drive
- Eliminates spinning and fastener damage
- Two recess sizes (30 & 40) to match the torque requirements of the screw size
- Gives better bit life

Washer Head Cabinet Screw

For interior cabinet installation

#10 x 2 1/2" & #10 x 3" lengths

Threads w/ Spiral Notches

- Make driving easier

Type 17 Extra Sharp Point

- Drives easily
- Reduces splitting

Round Washer Head

- 1/2" diameter
