Flat Head Self Drill with Reamer Wings

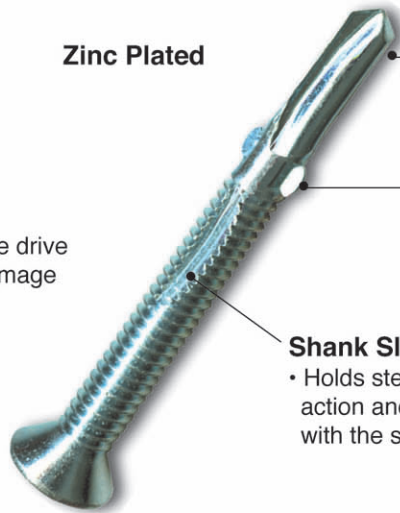

A specialized self-drilling fastener designed specifically for fastening plywood and other wood products to steel or aluminum. The reamer wings drill through the wood layer and snap off on contact with steel or aluminum.

Star Drive Recess

- Reduces camout and end load
- Twice the torque of Phillips or square drive
- Eliminates spinning and fastener damage
- Gives better bit life

Zinc Plated

Self-Drilling Point

- #3 or #4 points

Reamer Wings

- Drill through wood
- Automatically snap off when they encounter steel or aluminum

Shank Slot

- Holds steel shavings from the screw's drill action and prevents them from interfering with the screw threads as they tap into steel
