Some New Features On Our Gen II Line!

Horizon Curve™

A slight curvature of the head for elegant, professional, architectural results. The Finish Ring underneath the head also provides a better finish by cutting the top fibers in the wood for an extra step in countersinking.

AXIS™

NOVA™

ROCO™

FASCIA

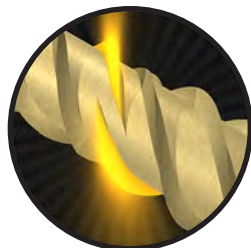

Turbine Ribs™

The patented (# 11,346,388 B2) Turbine Ribs cut quickly into the wood, leaving a professional, clean finish with maximum wood contact. The cup shaped, countersinking head provides increased holding power and reduced risk of splitting.

AXIS™

EPIC™

ROCO™

Twin Blades™

This patented (#11,359,661 B2) set of knurls cuts fast to dramatically reduce friction and heat on the shank, while reducing load on the drill. They also provide better performance by removing debris faster than a standard fastener's knurl.

AXIS™

EPIC™

AURA™

NOVA™

YUKON™

Fast Start Tip

With sharp threads all the way to the tip, the fastener has an immediate grip for a fast start. The inset thread cut drastically reduces the splitting effect and minimizes the driving torque needed to engage the wood.

About Our New GEN II Coatings

Corrosion Protection: Medium	Corrosion Protection: High	Corrosion Protection: Very High
For Typical Interior Use	For Typical Exterior Use	For Tough Environments
Compatible for use in a wide variety of interior wood applications. Its use is limited to interior untreated lumber. For exterior applications and use in pressure treated lumber, use exterior coated fasteners or stainless steel fasteners. Always assess the environment before selecting the type of coated fastener. Some corrosive environments including bathrooms, kitchen sinks, exposure to chemicals and use of pressure treated lumber may cause early failure. • ZYTEC™+	Tested and recognized for use in most ground contact pressure treated lumber for general exterior construction as described by the American Wood Protection Association (AWPA) U1 UC4A or below. For environments above UC4A, use proper grade of stainless steel. Always assess the environment before selecting the type of coated fastener. Some corrosive environments including exposure to water, airborne salt, chemicals and pressure treated lumber rated above AWPA UC4A may cause early failure. • ZYTEC™GX • ZYTEC™XT	Stainless Steel AISI 316 is code compliant for use in marine environments with saltwater splash, airborne salts, and areas with de-icing salts. Stainless Steel Our stainless steel is either AISI 302, 304 or 305 and is code compliant for use with ground contact pressure treated lumber in wet environments such as near freshwater lakes and rivers, and for use in redwood and cedar.
Always follow timber manufacturer's recommendations for fasteners!		

The **AXIS™** screw is designed to take wood screws to an entire new level. Our extra sharp, Fast Start Tip saves time on site and the Twin Blades™ outperform any other knurl. The self-tapping thread cuts effectively through materials such as wood, plastic and sheet metal. The Turbine Ribs™ ensure an incredibly clean finish. Its cup shaped countersinking provides unparalleled holding power and less risk of splitting. The Horizon Curve™ leaves an elegant appearance.

DrJ TER 2212-01

The **EPIC™** screw is the next generation of our Trim Head Wood Screw. Our extra sharp, Fast Start Tip saves time on site and the Twin Blades™ outperform any other knurl. The self-tapping thread cuts effectively through materials such as wood, plastic and sheet metal. The Turbine Ribs™ ensure an incredibly clean finish. Its cup shaped countersinking provides unparalleled holding power and less risk of splitting. The small trim head provides a clean, professional connection. White Head available.

The **PICO™** Finish screw is a slim fastener, yet engineered for good holding power. Our extra sharp Drill Cut Tip cuts wood fibers and reduces splitting of board edges. The self-tapping thread cuts effectively through materials such as wood, plastic and sheet metal. The wide threads provides a strong connection while the reverse threads helps pull down fibers. The tiny head stays out of sight for a clean, professional finish. Fits with most concealed mounting tools. White Head available.

AURA™ ZYTEC™ GX Exterior Screws For Cabinetry & More

The AURA™ screw features an aesthetic design of the mushroom head shaped to fit in cabinetry, furniture and more. The large diameter head of the fastener ensures increased holding power. The self-tapping thread cuts effectively through materials such as wood, plastic and sheet metal. Our extra sharp Fast Start Tip allows the screw to grip quickly into the wood providing easy installation. Use #8 for Pocket Joinery. Great for cabinets, vinyl windows and door frames, siding and cladding.

The new NOVA™ Structural Lag is the superior lag screw for any of your projects. With a strong thread that ensures maximum withdrawal strength and extra sharp Fast Start Tip that easily grips and cuts its way through the wood. The self-tapping thread cuts effectively through materials such as wood, plastic and sheet metal. The Twin Blades™ ensures minimum friction on the shank and the Locking Wedges under the head countersink perfectly with maximum wood contact.

50ct-EA are 50ct boxes with individual UPC stickered screws for retail sale.

The ROCO™ Wood to Steel screw is specifically designed for increased holding power and an incredibly clean finish. When engaging the wood, the screw effortlessly drills through the wood while the wings mill an oversized hole. When the screw engages the steel base, the oversized hole prevents threads from engaging the wood, lifting wood and steel apart (jacking). The specially engineered drill point cuts fast through the steel and the threads firmly clamp the wood and steel together.

The VEGA is specially designed to be fastened in the bottom of the corrugated plastic panel, resulting in a smoother installation and more aesthetic look. No predrilling needed! The wings mill an oversize hole which allows for thermal movement and reduces the risk of cracks. The special washer seals perfectly and covers the hole completely. Coated with **ZYTEC™ M** for typical outdoor use and with Self-Tapping threads.

D2W™ Deck2Wall Spacers**Made In The USA!**

Designed to create airspace between structures and attachments like deck ledgers, stair stringers, and posts, helping prevent rot. Deck2Wall Spacers install easily by fastening to the ledger with properly sized screws or nails before bolting. Their large diameter offers greater bearing surface than standard washers.

**DeckLok® Deck Brackets & RailLok® For Railing Sections**

DeckLok® provides a bolted connection at all critical structural locations of your deck. Great for the deck-to-ledger connection, stair stringer, rail post and more. A single pair of DeckLok brackets provides 4000 lbs of pull out resistance and will also increase rail post connections by up to 500%. **RailLok®** is used to connect fence sections to the rail post. Attach the brackets to the rail post using included screws and then slip pre-assembled fence sections into the brackets and screw them in place. RailLok brackets provide a strong, reliable fence section to post connection.

See our website for ICC Report
