THE ULTIMATE FASTENERS

EXTERIOR & STAINLESS COMPOSITE DECK

C·DECK

TREX® Approved!

Small Head
The small head delivers a clean, low-profile finish with minimal surface visibility. Designed to blend seamlessly into composite decking for a smooth, professional appearance.

Reverse Threads
Reverse threads help reduce mushrooming and material buildup around the screw head, creating a cleaner finish while allowing composite decking to sit flush against the surface.

Self Tapping Threads
Aggressive self-tapping threads provide fast, easy installation by cutting smoothly into composite decking, delivering strong holding power and secure fastening with reduced driving effort.

Fast Start Tip
Type 17 tip reduces splitting, minimizes driving torque, and allows fast, easy penetration, providing smooth installation & reliable fastening performance.

Our advanced Composite Deck Screw is available in Exterior Coating or 305 Stainless Steel for enhanced corrosion protection in exterior environments. Great for any size job or project.

Available in 75, 350 and 1750ct
All Packaging Includes Drive Bit!

Construction	#10
Head diameter (inch)	0.260"
Minor thread diameter	0.140"
Major thread diameter	0.190"
Shaft diameter	0.154"
Drive Size	TX20
Fastener Size	**Thread Length**
#10 x 2-3/4"	Full Thread

TX20 SS EXT

Exterior Coating: Tested and recognized for use in most ground contact pressure treated lumber for general exterior construction as described by the American Wood Protection Association (AWPA) U1 UC4A or below. Always follow board manufacturer's recommendations for fasteners.

305 Stainless Steel: Our stainless steel is code compliant for use with ground contact pressure treated lumber in wet environments such as near freshwater lakes and rivers, and for use in redwood and cedar.

Common Applications

- Commercial & residential Composite Decking
- Wood Decking and Much more!
