DOCK PANEL

PAN HEAD DOCK PANEL SCREWS

**NEW! 316
STAINLESS
STEEL**

Specifically Engineered Pan Head

OCEA™ is engineered to fit most major dock panel systems and provides a clean, professional finish. It features a deep star drive for easy installation.

Graduated Shoulder

The bigger head increases holding power on the panel, while the graduated shoulder from head to shank ensures maximum strength for the fastener head.

Engineered Thread Design

This thread is engineered with a specific ratio between the minor and major diameters to maximize engagement within the substrate, resulting in superior withdrawal strength.

Fast Start Tip

With sharp threads all the way to the tip, the fastener has an immediate grip for a fast start. The inset thread cut drastically reduces the splitting effect and minimizes the driving torque needed to engage the wood.

The advanced 316 Stainless Steel
Dock Panel Screw for typical high-corrosive,
seaside environments.

Available in 75ct, 350ct & 1750ct.
All Packaging Includes Drive Bit!

THE ULTIMATE FASTENERS

316 STAINLESS STEEL

DOCK PANEL

Upgrade your waterfront installation projects with OCEA™, our new dock panel screw. Engineered for strength, corrosion resistance, and easy installation, delivering secure connections, long lasting performance, and dependable results in harsh marine environments. OCEA™ comes conveniently packaged in reusable containers and includes a TX20 drive bit.

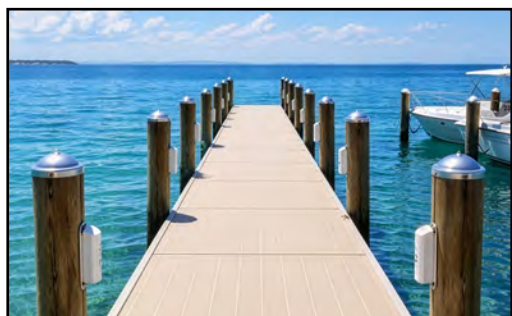

TOUGH ENVIRONMENTS

Stainless Steel AISI 316 is code compliant for use in marine environments with salt-water splash, airborne salts, and areas with de-icing salts.

Installation Tips

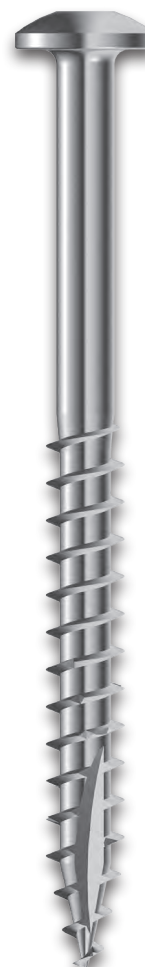

- Specifically designed for Dock Panels.
- Check for any applicable local building codes.
- Do not overtighten fasteners. Leave room for thermal expansion.
- Always follow panel manufacturer's installation instructions!

Sizes Available: #10 x 2-1/2" to #10 x 3"

General Info	
Type of Screw	Dock Panel Screw
Material	316 Stainless Steel
Head Style	Pan Head TX20 Star Drive
Point Type	Modified Type 17

Construction	#10
Head diameter (inch)	0.374"
Minor thread diameter	0.136"
Major thread diameter	0.211"
Shaft diameter	0.154"
Drive Size	TX20
Fastener Size	Thread Length
#10 x 2-1/2"	1-1/2"
#10 x 3"	2"
